OPERABLE UNIT (OU) 5, PHOTOGRAPHS OF TEMPORARY PARSHALL FLUME INSTALLATIONS
FOR THE PHASE I RFI DATA COLLECTION IN OUs 5 AND 6 AT THE ROCKY FLATS PLANT -
WSB-254-93

This letter transmits two copies of the photographs of temporary Parshall flume installations for the Phase I RFI data collection in Operable Units 5 and 6 at the Rocky Flats Plant.

The Parshall flumes will remain in place for one year or until they are replaced by permanent H-flume installations. A second set of photographs will be taken prior to removal of the Parshall flumes and also after installation of the H-flume. The purpose of these photographs is to demonstrate that no adverse impact to RFP wetlands will result from the flume installations.

If you have any questions regarding this transmittal, please contact G. A. Wetherbee of EPM/Surface Water Division at extension 8685 or E. C. Mast of ERM/Remediation Project Management at extension 8589.

W. S. Busby
Acting Director
ERM/Remediation Project Management
